Stable Growth with Access to Low-Cost Capital

Management team focused on maintaining asset quality, proper capital allocation, and operational excellence

SCM Provides Flexible Financing for Middle Market Companies

Investment Type & Size

- Investment size between \$10 and \$30 million per transaction.
- Senior secured first lien, unitranche, split lien and second lien debt financings, often with corresponding equity investments.
- Underwriting capabilities up to \$100 million.

Investment Focus

- Private companies generating between \$5 and \$50 million of EBITDA.
- Diverse industry sectors
- Capital is often used for acquisitions, growth capital, leveraged buyouts, and recapitalizations.
- Substantially all investments are in portfolio companies backed by high quality PE sponsors.

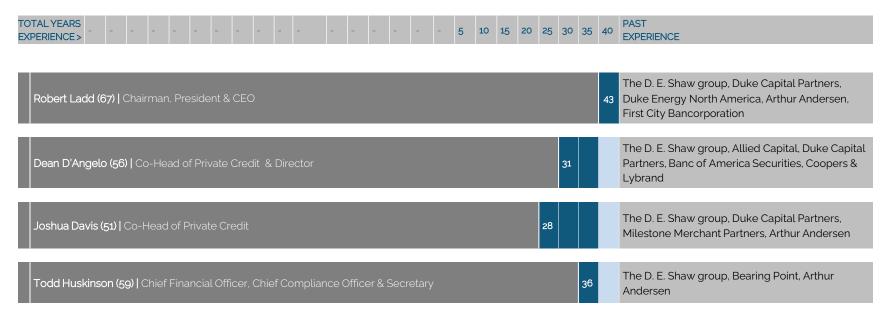

Origination Focus

- Focus on originated loans, as opposed to broadly syndicated financings. SCM is typically the sole lender in the tranches in which it invests. However, we are open to partnering with a small number of lenders in "club" deals.
- Companies headquartered (or with a majority of their operations) in the United States and Canada.

(1) Core net investment income, as presented, excludes the impact of capital gains incentive fees and income taxes, the majority of which are excise taxes. The company believes presenting core net investment income and the related per share amount is a useful supplemental disclosure for analyzing its financial performance. However, core net investment income is a non-US GAAP measure and should not be considered as a replacement for net investment income and other enamings measures presented in accordance with US GAAP to reconciliation of net investment income in accordance with US GAAP to core net investment income is presented in the table below the financial statements.

(2) Total realized income is the sum of net investment income, net realized gains (losses) on investments, net realized gains (losses) on foreign currency, and loss on debt extinguishment; all U.S GAAP measures.

⁽¹⁾ The dollar-weighted average annualized effective yield is computed using the effective interest rate for our debt investments and other income producing investments, including cash and PIK interest, as well as the accretion of deferred fees. The individual investment yields are then weighted by the respective cost of the investments (as of the date presented) in calculating the weighted average effective yield of the portfolio. The dollar-weighted average annualized yield on the Company's investments for a given period will generally be higher than what investors of our common stock would realize in a return over the same period because the dollar-weighted average annualized yield does not reflect the Company's expense or any sales load that may be paid by investors.

The dollar weighted average yield on total investments takes the same yields as calculated in the footnote above, but weights them to determine the weighted average effective yield as a percentage of the Company's total investments, including non-income producing loans and equity.
